Front-End Web Developer
With 2 years of hands-on experience building dynamic, user-friendly web applications. Experience in modern front-end technologies, frameworks, and tools. Known for delivering high-quality results, strong problem-solving skills, and exceeding expectations in both technical and operational roles. Proven ability to thrive in collaborative environments and continuously improve.

Technical Skills
Programming Languages: HTML5, CSS, JavaScript, TypeScript
Frameworks & Libraries React, Next.js, Material-UI, Redux, Vue, TailwindCSS
Tools & Platforms: Git, GitHub, NPM, Yarn, Web Pack, Firebase, Supabase, Vercel
Development Practices: API integration, Chrome DevTools, Git version control
Soft Skills: Customer service, Analytical and problem-solving

Professional Experience
Frontend Developer Intern   *Frontend Simplified | Jun 2024 – Oct 2024*
- Revamped a static HTML/CSS/JavaScript application into a dynamic, interactive UI using React and CSS animations, improving user engagement by 30%.
- Implemented API data fetching with Axios, side scrolling with Owl Carousel, animations with AOS animation library and utilising skeleton loaders and pagination to enhance user experience and load times.
- Worked in a collaborative GitHub environment, using Git for version control and code review processes, ensuring any merges do not conflict with the main branch.

Windscreen Technician & Customer Service   *AutoWindscreens | Jun 2022 – Aug 2024*
- Awarded Employee of the Month multiple times for exceptional performance, increasing customer satisfaction and getting feedback from management for good reviews.
- Led and conducted solo windscreen repairs and replacements while using digital tools to streamline service requests and customer communication.
- Helped other team members with larger jobs decreasing fitting time and injury.

Logistics & Delivery Coordinator   *Group Tyre | Apr 2022 – Jun 2022*
- Handled customer payments via cash and cheque
- Deliver roughly 200-400 tyres daily.
- Ensured high customer satisfaction through effective communication and on-time deliveries.

Stock & Logistics Support   *TLC Direct | Apr 2021 – Apr 2022*
- Managed delivery logistics using routing software, optimising delivery schedules and communicating with customers to have an 98% successful delivery rate.
- Pick and wire cut stock for in store customers and deliveries
- Ensured professional customer service and timely deliveries, striving for customer satisfaction.

Projects (personal)
YouTube Clone: Developed using Vite.js & moment.js, integrated YouTube API, providing real-time video search and playback with a fully responsive design.
Netflix Clone: Created with Next.js & React Toastify, featuring firebase authentication, real-time movie data, a trending content carousel, and responsive UI, improving user experience for seamless content discovery.
NFT Marketplace: Expanded an HTML app into a React-powered multi-page mock site, integrating API-driven NFT data and auction expiration timers via Axios, increasing user engagement through dynamic routing and AOS animations.
Twitter Clone: Next.js app with firebase authentication and real-time post updates, improving social interaction for users.
Movie Review Website: Built with React & Node.js. Features review submission, search, and editing.

Education & Certifications
Frontend Simplified   – Frontend Developer Bootcamp (2022)Gain knowledge and practical skills in HTML, CSS, JavaScript, React, TypeScript, Node.js, Next.js, TailwindCSS, Redux, Firebase.Built responsive multi-page apps, implemented Git operations, hosted on Vercel & Heroku.
